SUMMARY

Results-driven **[Business, Data]** Analyst with strong expertise in SQL, Power BI, Excel, and Python, focused on turning complex data into actionable strategic insights. Experienced in building automated dashboards, predictive models, and data-driven solutions that elevate operational performance. Track record of driving impact, including increasing ROI by 12%, boosting delivery efficiency by 15%, and reducing manual errors by 90%. Backed by a strong foundation in machine learning and process optimization, and currently pursuing an MBA in Data Science & AI to further drive data-backed growth and innovation.

EXPERIENCE

Earth5R – Market Research Intern Aug 2025 |Aug 2025 – Nov 2025

- Designed and executed digital marketing campaigns to promote sustainability initiatives, improving online engagement by 35% through analytics-driven SEO and content optimization.
- Conducted market research and competitor analysis to identify high-value opportunities for partnerships with NGOs, universities, and businesses, supporting organizational growth strategy.
- Managed and analyzed multi-platform social media performance (LinkedIn, Instagram, Twitter, Facebook), refining content strategy and boosting interaction rates by 25%.

Edunet Foundation & AICTE – Cybersecurity with Gen AI Intern | Dec 2025 – Jan 2026

- Developed an AI-driven Network Intrusion Detection System (NIDS) using a Random Forest Classifier , achieving >99% accuracy in identifying real-time threats like DoS and Brute Force attacks.
- Deployed a low-latency Streamlit dashboard for live packet inspection and feature analysis, automating SOC workflows.
- Built 'CyberLogger,' a multi-threaded Python application with a modern GUI , implementing Base64 encryption for secure data obfuscation and input interception study.
- Conducted threat analysis and vulnerability assessments utilizing Generative AI, Wireshark, the Social Engineering Toolkit, and the BeEF Framework.

VIRTUAL INTERNSHIPS

- ❖ Goldman Sachs Risk Assessment & Management Simulation | Forage
- ❖ Deloitte AU Data Analytics Simulation | Tableau & Excel Analysis | Forage
- ❖ PwC Switzerland Power BI Job Simulation | PwC
- ❖ Goldman Sachs Excel Skills for Business Job Simulation on Forage | Forage
- ❖ Bank of America Global Markets Sales and Trading Analyst Job Simulation | Forage
- ❖ AWS Solutions Architecture Job Simulation | Forage
- ❖ Tata GenAI-Powered Data Analytics Job Simulation | Forage

PROJECTS

Risk Assessment & Strategic Investment Insights | Tableau

- ❖ Developed a Tableau dashboard leveraging 10,000+ financial records and 15 KPIs to assess risk and monitor ROI across 100 companies. Delivered actionable insights that increased portfolio ROI by 12%, reduced exposure to high-risk assets by 20%, and enhanced analysis efficiency by 30%.

Logistics Performance Optimization Dashboard | POWER BI

- ❖ Designed and deployed a Power BI dashboard to optimize logistics operations, boosting on-time deliveries by 15% and cutting delivery delays by 10%. Integrated data across regions, shipping modes, and carriers to uncover inefficiencies, enabling strategic decisions that enhanced supply chain performance and reduced costs.

Automated Employee Payroll Management System | SQL

- ❖ Built a dynamic payroll management system using MySQL to automate salary calculations, attendance tracking, and report generation. Streamlined payroll processing by integrating salary, bonuses, and deductions, reducing manual errors by 90%. Ensured data integrity through relational schema and foreign key constraints. Delivered insights on department-wise salary distribution, leave patterns, and performance-linked incentives

Predictive Supply Chain Analytics | Python & ML

- ❖ Engineered a predictive ML pipeline for demand forecasting and inventory planning, boosting forecast accuracy by 18%. Delivered SCM insights that reduced stockouts by 12% and optimized supplier performance, driving measurable cost savings.

Customer Churn Prediction | Python, SQL, ML

- ❖ Designed and deployed churn prediction models (Logistic Regression, Random Forest, XGBoost) achieving an AUC of 0.87. Uncovered key churn drivers through SQL-based preprocessing and EDA, enabling targeted retention strategies that improved customer loyalty by 10%.

Vision Heaven – “Streamlining Sight, Simplifying Care” | SQL

- ❖ Vision Heaven is a structured MySQL-based database system designed to efficiently manage funeral service records, including client data, deceased details, payment transactions, and funeral bookings. The system enhances record accuracy, service tracking, and timely reporting for streamlined operations and data-driven decisions.

SKILLS

Programming Language: Python

Database: MySQL, PostgreSQL

Visualization Tools: Power BI, Tableau, Google Looker, MS

Excel **Analytical Tools:** Data Cleaning, Data Transformation,

Dashboarding **Technologies:** Machine Learning (ML), Artificial

Intelligence (AI)

Data Handling: Data Cleaning, Data Transformation (ETL,ELT) & Dashboarding.

Machine Learning & AI Tools: Scikit-learn, TensorFlow, Spacy, Sentence-BERT, MLflow, Evidently AI.

Other Tools: Git/GitHub, Streamlit, Flask.

EDUCATION	
Master of Business Administration	Pursuing
Manipal University Jaipur	2025-2027
Bachelor of Science	CGPA: 8.21
K.V. Pendharkar College, (University of Mumbai)	2021-2023
Higher Secondary Certificate	44.92 %
Royal Junior College, Mumbai	2020
Secondary School Certificate	53.20 %
Omkar English Medium School, Mumbai	2018

COURSE

Masters in data science and Analytics with AI – **IT Vedant Education Pvt. Ltd** | Jan 2025 – March 2026

CERTIFICATIONS

- ❖ IBM | Machine Learning
 - ❖ IBM | Diving into World of Data
 - ❖ IBM | Analysis with Python
 - ❖ IBM | Python for Data Science
